FREE LEARNER GUIDE

Workshop safety & skills logbook

Technical and vocational subjects aligned to Zimbabwe's education framework, so every learner graduates with practical, employable capability.

The skills cycle

1 Plan
Read the drawing or recipe, list the materials and the order of work.

2 Make
Work carefully and accurately, using the right tools safely.

3 Check
Measure and inspect the work against the specification.

4 Improve
Ask for feedback and make the next piece even better.

Skills employers look for

Communication	Explaining ideas clearly and listening well.
Teamwork	Working with others to reach a shared goal.
Problem solving	Finding a way forward when something goes wrong.
Reliability	Arriving on time and finishing what you start.
Numeracy	Measuring, costing and calculating accurately.
Digital skills	Using computers and phones for work, safely.

Workshop safety

1. Wear the right PPE: goggles, overalls and closed shoes.
2. Only use a machine after you have been shown how.
3. Keep the floor and bench clear and dry.
4. Never leave a hot or running tool unattended.
5. Report damaged tools straight away.
6. Clean and return every tool at the end.

Skills logbook

Date	Task	Tools and PPE used	What went well	Next time I will…

Check yourself

1. What does PPE stand for?

2. What comes after ‘Make’ in the skills cycle?

3. Give one reason to keep the workshop floor clear.

Answers 1. Personal protective equipment. · 2. Check: measure and inspect the work. · 3. To stop slips and trips, especially near machines.
